

Naturesani's no-odour, waterless urinal bowls represent a significant leap forward in restroom technology. By addressing the challenges of traditional urinals, this innovative solution not only contributes to water conservation and environmental sustainability but also enhances hygiene and cost-effectiveness. As the world continues to seek eco-friendly alternatives, Naturesani stands out as a beacon of progress in the realm of restroom innovation.

NATURESANI BOWL CONSISTS OF:

Urinal Bowl

A sustainable solution for water conservation without compromising hygiene, sleek design and easy maintenance making it a perfect fit for any restroom.

Curvature profile

No sealant liquids

High durability

Patented Technology

Traps bad odours

Urinal screen

Naturesani Urinal screens are designed in a totally different shape with Casing on top to hold Bio- Blocks / Activated Carbon Pellets. This shape ensures that maximum liquid slips into the Cartridge and reaches the Drain Pipe without holding up of liquid.

2 stages of filtration unique, specially designed urinal screen

1st stage: 3-5mm gap, blocks larger objects likes cigarettes, chewing gums etc

2nd stage: Multiple filters slits block hair & other items

Retro Fit

Customise any Existing compatible traditional Urinal bowls to No Odour, Water/Flush Free with our carefully designed Waterless Urinal Conversion Kit / Retrofit, avoiding need for replacing existing bowls. Fragrance pellets / Activated Carbon can be added in the chamber provided in the Urinal Screen. Total Water savings due to absence of water flushing, minimal water is required to clean the bowl.

High durability

No sealant liquids

No-odo seal (floor trap)

A seamless drainage solution, Our floor traps designed for swift water drainage maintaining optimal hygiene.

Specially designed for odour, roach free

Hot & cold resistant

Use in washrooms, toilets & drains at houses as well as organizations

Sustain - 10°c to 60°c temperature
