# A LEADING SPECIALTY CHEMICALS PLAYER

Rossari Biotech Limited is a pioneering force in the Indian specialty chemicals market, providing solutions in a sustainable and eco-friendly, yet competitive manner. We are ranked amongst India’s leading specialty chemical manufacturers and exporters, with a 20-year history of rapid growth.

Building on our proficiency in Textile Specialty Chemicals, we diversified into the animal health & nutrition, home & personal care as well as cleaning and performance chemicals markets.

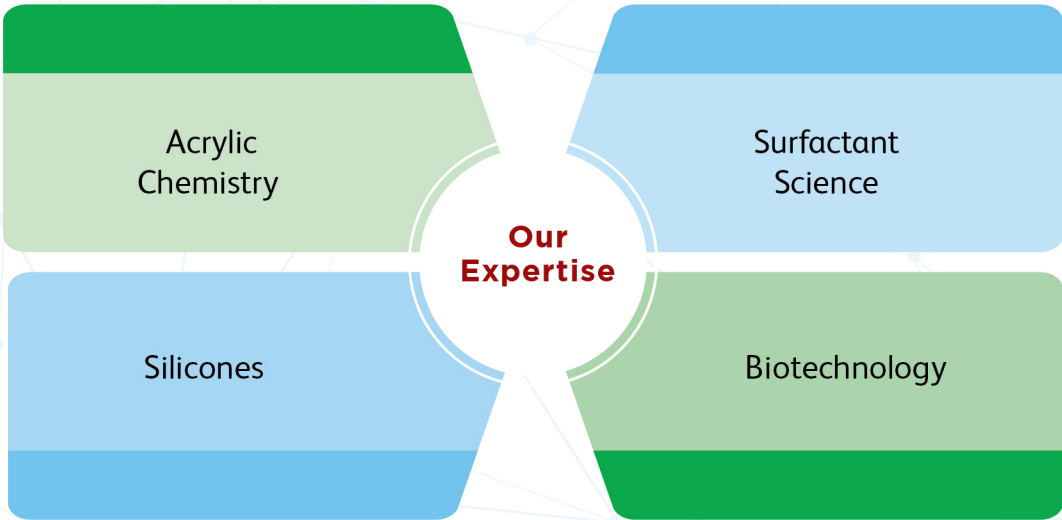

**HPPC**  
(Home, Personal Care & Performance Chemicals)

**TSC**  
(Textile Specialty Chemicals)

**AHN**  
(Animal Health & Nutrition)

# CREATING BUSINESS DRIVERS OF TOMORROW

HPPC

Home,  
Personal Care  
& Performance  
Chemicals

Our capabilities in finding the right formulations and applications are the key reasons for our success in the HPPC products category. We manufacture and supply specialty chemical products in the soaps and detergent, paints, inks and coatings, ceramics and tiles. Going ahead, we are in the process of manufacturing chemicals for water treatment and pulp and paper industries too.

TSC

Textile  
Specialty  
Chemicals

The Textile Specialty Chemicals industry has witnessed a structural change. At Rossari, we have managed to keep pace with the evolving trends by realigning our strategies and consolidating ourselves to continue moving on the path to lasting success. With sustainability as our core strategy, we invested in product innovations to benefit from efficiencies, effectiveness and economic gains.

AHN

Animal  
Health &  
Nutrition

We supply animal feed ingredients, animal feed supplements and pet grooming products through our Animal Health & Nutrition segment, including products for weaning of infants and adult pets. We made a foray into pet grooming products with the acquisition of Brand Lozalo, a shampoo for pets. The portfolio has been further expanded by adding pet treats, pet food and pet care products.

## ABOUT TISSUE PAPERS

Cleanliness and hygiene play a pivotal role to maintain a healthy lifestyle but definitely not at the cost of causing harm to the environment. This is where we intend to change the way people look at tissue papers. We have found out a way to manufacture tissue papers whilst preserving the environment, and we have been doing this consistently over a long period of time. In today's times where innovation and technology has made everything possible, we have evolved to manufacture our products by making use of recycled paper and / or virgin paper sourced from responsibly managed plantations where the plantations are harvested and replanted at every required intervals. Hence whether its recycled tissue or virgin tissue we make it a point to preserve the environment while using our wide range of tissue for healthier and cleaner work environment. This is our small contribution towards ensuring a clean and green india.

With a wide range of products offered under one of the most recognized and respected brands – **'Green World', 'Concord' and 'Boutique'** (catering to institutional and retail space), we eliminate the guesswork for you and your team at work or family at home.

Are you ready to make your surroundings and workplace truly exceptional? We are ready to help with our dedicated commitment towards creating spaces that are healthier, safer and more productive.

## ABOUT OUR ALUMINIUM FOIL WRAPS & CONTAINERS

Aluminium foil wrap has been a go-to product for packing food be it for school, college or work place, heading out for a picnic or planning a trip. However, there have been concerns about the food staying warm and skepticism about aluminium foil wraps / containers storing the food for a long time. The aluminium foil has reflective properties and acts as a barrier to light and oxygen. As a result, the foil reflects the thermal energy back to the food maintaining the original aroma, moisture and flavor of the food. It is often used for packaging of perishable foods and dairy products for longer storage. Aluminium foil's usage isn't only limited to food, it can also be placed on windows to keep the house cool during summer and hot during winters.

## BATHROOM TISSUE TOILET ROLL

'Green World' range of 2-ply bathroom tissue is one of our favourite toilet papers because they are tough and at the same time soft to the skin. You don't have to deal with any skin irritation because this product is extremely comfortable and soft. 'Green World' range of bathroom tissues also dissolve rapidly, flushes easily and disintegrates faster, as a result do not cause clogging. Made from 100% recycled waste paper or with 100% wood & bamboo from earmarked regenerative forest sources our tissues are 100% environmental and eco friendly.

## JUMBO ROLL TISSUE

We proudly present the 'Green World' range of toilet paper jumbo rolls to our precious customers. The paper rolls are tear resistance and eco-friendly in nature. As the name suggests, this tissue can handle high capacity with low maintenance. It is most suitable for toilets / bathrooms that are visited by a very large number of people on regular basis. Due to its high capacity feature, the housekeeping staff (or people who maintain cleanliness) have a lesser workload, thereby saving their time. The lockable dispenser ensures people do not waste or take away more than required tissue, helping controlled usage and higher savings.

HYGIENE BATHROOM TISSUE

One of our strong recommendations is our 'Green World' range of HBT's (Hygiene Bathroom Tissues). This product comprises of a single sheet dispensing system and provides better hygiene as well as sanitation. With its high absorption capacity, it effectively limits usage and cost.

Some of the benefits associated with 'Green World' hygienic bathroom tissues are as follows:

- Eliminates wastage – exact number of sheets used as required. No sheet is wasted while replacing / refilling the dispenser as opposed to the toilet roll which is disposed even if there are a few sheets remaining as the replacements are done at regular intervals.
- High hygiene levels - only the sheet used is touched. The enclosed design of the dispenser helps to protect the stored, unused bathroom tissues from dirt, dust & contamination hence maintaining the highest standard of hygiene.

- Convenient - single hand dispensing pre-cut bathroom tissues enable one-at-a-time dispensing - ensuring users use only what is required.
- Avoid blocked drains - tissue disintegrates in water which enables easy flushing, causing no plumbing problems or blocked drains.

## TOWEL GRADE

### COMPARISON OF ROLL TOWEL SYSTEM WITH M / C FOLD TOWEL SYSTEM

Parameters	Roll Towel System	C / M Fold Dispenser
Value for Money	Roll towels are utilised till the last sheet of the roll, helping control wastage and generate value for money	M/C Fold can not control the usage due to design incapacibilities.
Spillage Control	Roll towel system is designed to dispense only 1 towel with every dispense to control spillage.	There are instances of multiple towels coming out of the opening in one pull thus leading to spillage and wastage.
Environment Friendly	Roll towel system is free from the use of poly packs a potential environment hazard results in your contribution towards saving environment	M/C Fold towels are essentially packed in polypacks.
Space Optimization	Roll towel system can accommodate approx 75% more towels than C/M fold towels in the dispensers.	M/C fold can accommodate lesser towels as compared to the roll towels.
Reduces Towel Replacement Frequency	Thanks to higher capacity of towel accommodation within the same space as M/C Fold towel systems, it significantly reduces roll replacement frequency	Limitation of lower Number of towels at a time as against the roll towels, hence results in paper out situation much faster and leads to increased replacement frequency.

### TABLE TOP NAPKINS

These are high quality multipurpose table top napkins with wet as well as dry strength. 'Green World' table top napkins are manufactured from recycled tissue towel paper. These tissues are a must-have for all your parties, outings, and home as well as hotel and office canteen needs. # ALUMINUM KITCHEN FOIL

Aluminum foil is impervious to moisture, light, bacteria and all gases. Due to its ability to block out bacteria and moisture, it helps the food last longer.

Most of the food we consume tastes better when it is warm and fresh. Also, food is a major source of energy for our body and warm nutritious food is important to remain fit and healthy. Thus, most people prefer to carry home-made food wherever they go. With our premium quality '**Concord Foodwrap**' Aluminium kitchen foil products available in variety of packaging options to meet different sets of requirements, you can keep your food healthy and warm and store it for longer periods of time. '**Concord Foodwrap**' range of aluminium kitchen foils is the perfect choice to be able to consume warm and healthy food.
